ACADEMICS

University of Toronto, Applied Mathematics/Computer Science (2014-2018)

- University of Toronto Scholar (top 100 in class); CGPA: 4.00/4.00
- AP National Scholar (Canada)
- Past coursework: Introductory Physics, Linear Algebra I, Algebra II, Calculus (with proofs), Introductory Computer Science
- Current Coursework: Statistics I, Statistics II, Multivariable Calculus (with proofs), Software Design

SKILLS

Python (class design, recursion, unit testing; extensive experience in scientific computation)

LaTeX, HTML, CSS, MATLAB, Excel

EXPERIENCE

Astrophysics, McGill University

May - August 2015

Research assistant on 16-week NSERC Summer Undergraduate Research Award.

Assisted Dr. Andrew Cumming in producing models of exoplanets to constrain values for core fraction, envelope entropy and envelope mass given mass and radius measurements.

Cognitive Neuroscience, University of Toronto

September 2015 - April 2016

Participating in research project with Dr. Chris Honey on developing models of temporal information integration and comparing those models to human learning behaviour.

The Victoria College Strand

September 2014 - Present

Web Editor, Writer (Opinions), for the official student newspaper of Victoria College.

Have also assisted with copy editing and design.

University of Toronto Robotics Association

February 2015 - Present

Member of Beirut Autonomous Robot team. Involved with producing and applying optical content recognition algorithms using Python.
